Software Requirements Specifications

Document Purpose and Audience

- We will write a system requirements specifications about BookNetworks , and we will review the functions requirements and the scope of the project .
- Its guided to anyone who is interested in reading online books and rate it .

Software Purpose

The purpose of the document is to collect and analyze all assorted ideas that have come up to define the system, its requirements with respect to readers . Also, we shall predict and sort out how we hope this BooksNetwork will be used in order to gain a better understanding of the project, outline concepts that may be developed later, and document ideas that are being considered, but may be discarded as the Network develops .

Software Scope

We will build an online BookNetworks that have multiple users that can add books , read exist books , rate the books . each reader has his own shelves , he/she can add books ,mark the books as want to read books and separate the books based on its fields .other users can review friends books , like their reviews and be able to comment on it.

Requirements

Functional Requirements

- BookNetworks system allows users to log in with his user name and password.
- The system enables the user to create his /her own shelves , marks the books as (read ,currently reading, to read) .
- The system Helps the users either to search for the book or add it manually to their shelves .
- Each user uses the system can rate the books from one star (poor)to five stars (excellent)
- user can view his friends reviews, like their reviews and be able to comment on it.
- There is a news feed that show's friend's activities (finish read, currently reading, want to read, reviews, ratings).
- Each User has a profile consists of :1-basic information shelves, 2- favourite books(have rate =5 stars),3- currently reading(list of books which user currently reading), 4-latest update of the users, 5-favorite authors, 6- favorite genres).
- The system provides users to create a group and other users can join it, add posts and comments.
